

Ed Schweitzer

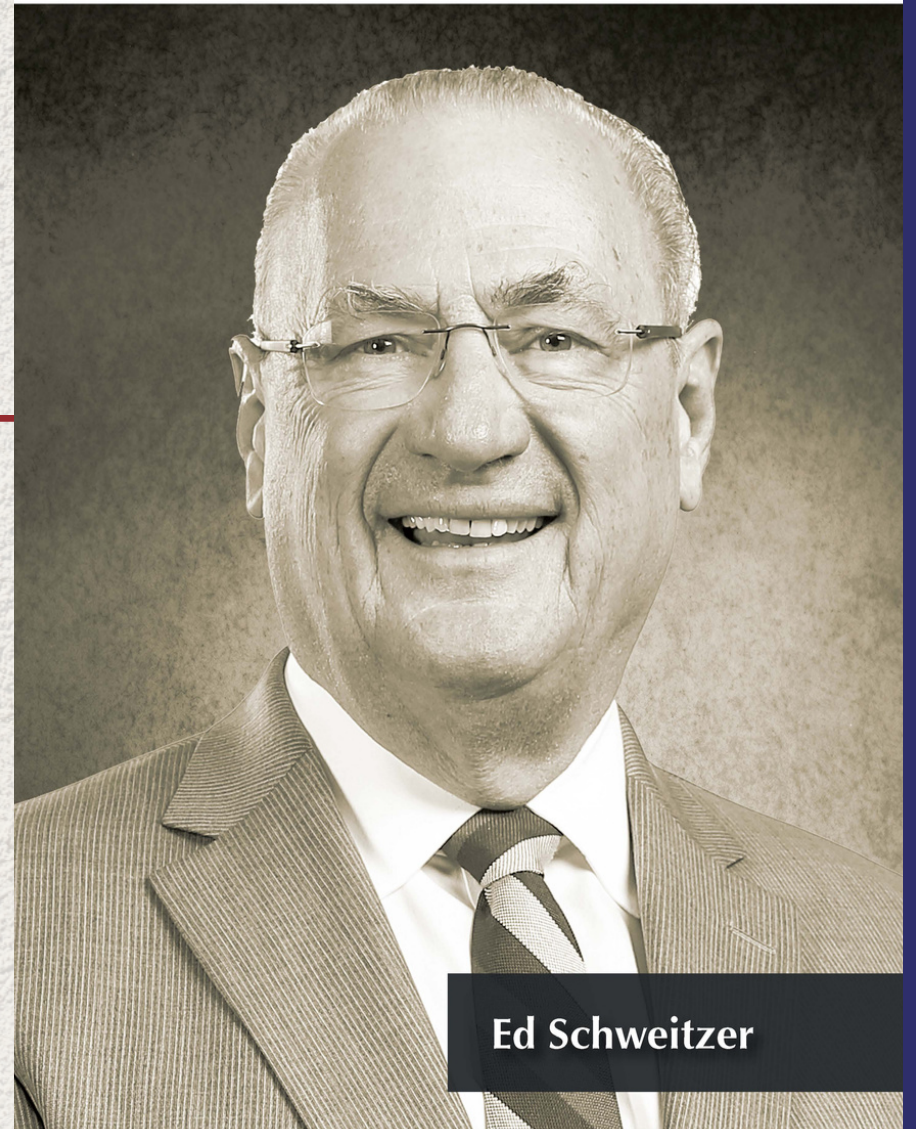

Dr. Edmund O. Schweitzer III is an inventor, business leader, thought leader, and a philanthropy leader in the state of Washington.

As of 2023, the company he founded, Schweitzer Engineering Laboratories (SEL), is 100% employee owned and employs more than 5,000 people. SEL designs and manufactures products with a mission to make electric power safer, more reliable, and more economical from generation, to transmission, and distribution.

SEL products protect Washington state, national, and global electric power grids. The company has repeatedly been chosen as one of the best places to work in the United States.

He is a prolific author and inventor, currently holding more than 200 patents worldwide pertaining to electric power systems.

Dr. Schweitzer and his wife Beatriz are committed to philanthropy and have contributed millions to education.
